

BAZOONGI KIDS™
Mushroom House #11120 Assembly Instructions

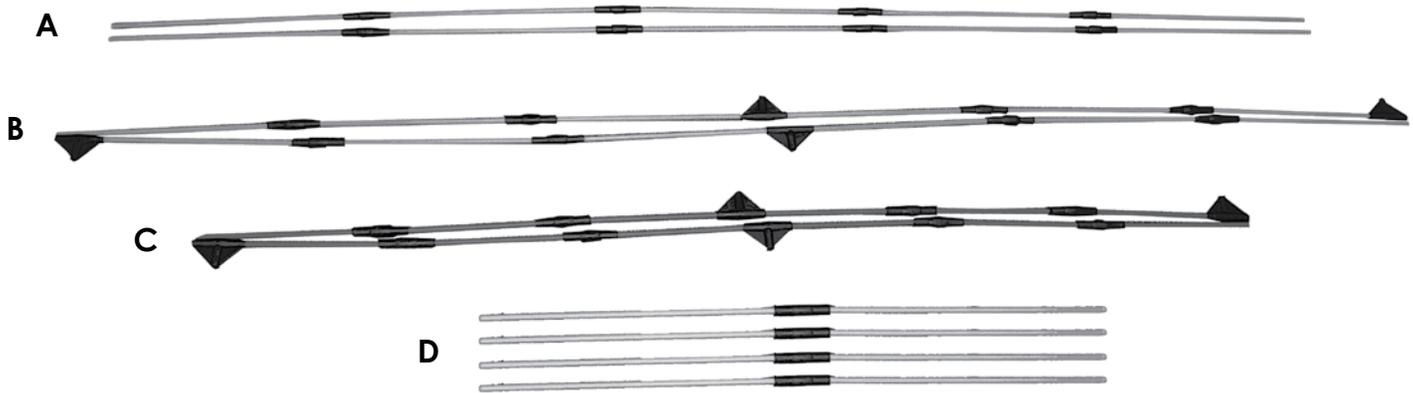

ASSEMBLE ONLY WITH ADULT SUPERVISION

PLEASE READ ALL OF THE DIRECTIONS PRIOR TO BEGINNING ASSEMBLY.
DO NOT APPLY EXCESSIVE FORCE TO THE POLES DURING ASSEMBLY.

Enjoy your Play Structure and be sure to contact us for any further information or help.

BAZOONGI KIDS™ LLC 3970 LINDBERGH DRIVE • ADDISON, TEXAS 75001
TOLL FREE: 1-800-206-5611 www.bazoongi.com

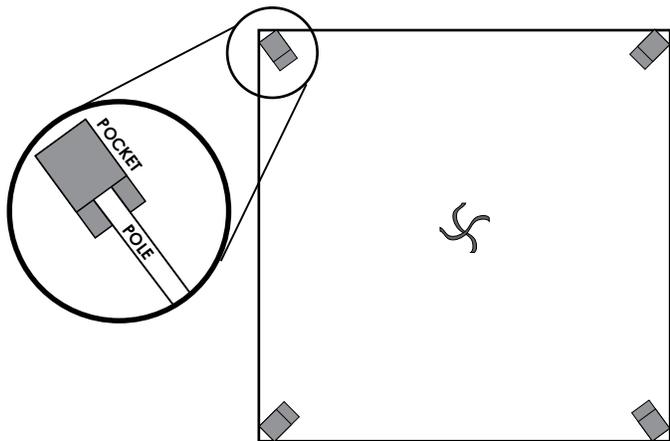

Step 1. Lay out all of the poles exactly as shown in the picture below.

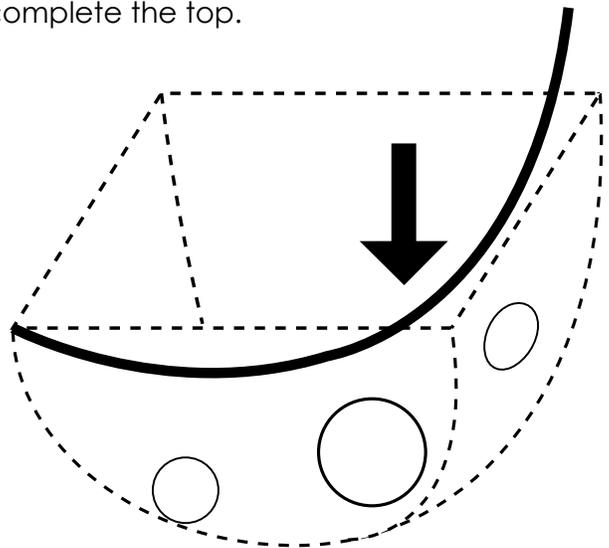

- A = 5 section YELLOW poles (qty 2)
- B = 12 section YELLOW pole with cord connecting all pieces (qty1)
- C = 12 section RED pole with cord connecting all pieces (qty1)
- D = 2 section YELLOW poles (qty 4)

Step 2. Assembling the Mushroom Top

Make sure that the red top is laid out with the yellow circles facing down. Find the four (4) pockets located at the corners of the top piece. Take **one** of the **5 section poles (A)** and put one end of it into the pocket **(Diagram 1)**. While holding the pole in place, push the pole so that it archs away from you and insert the other end of the pole into the pocket on the opposite corner **(Diagram 2)**. This will force the top into an arched shape. Repeat the step with the other **(A)** pole to complete the top.

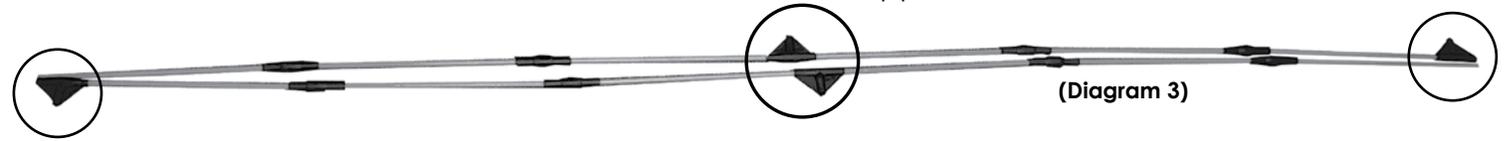

(Diagram 1)

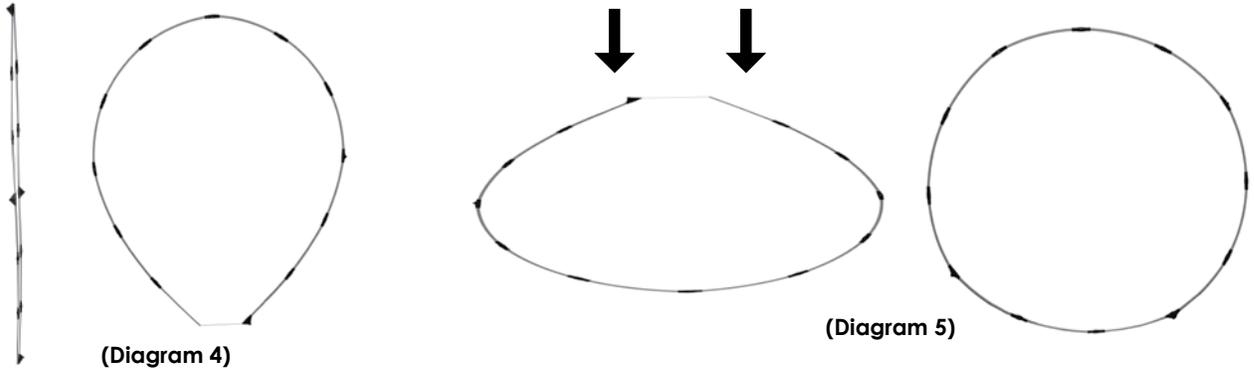

(Diagram 2)

Step 3. Assembling the Circles

First you will need to make circles from poles **(B)** and **(C)**. We will start with **(B)**. Connect the sections together until you have two straight sections that are six (6) a piece **(Diagram 3)**. Note that there are two triangular connectors in the center of each line and one at each end opposite of each other.

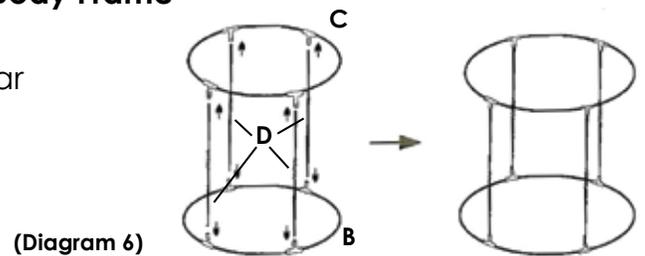

Hold the pole vertically. Grasp the top sections of the pole and while pushing downward connect the top triangular connector to the yellow pole section. This will result in a "U" shape forming **(Diagram 4)**. Now take the opposite end and bring it up to connect it together. Push downward on both sides you are going to connect, using the floor as resistance with the opposite side. Once connected you should have a circle shape **(Diagram 5)**. Repeat this process with the **(C)** pole to complete the top and bottom circles.

Step 4. Assembling the Body Frame

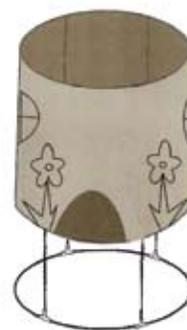

Place the Yellow Circle **(B)** on the floor with the triangular connectors pointing upwards. Next, place the four (4) yellow poles **(D)** vertically into the upward facing connectors of **(B)**. Now, connect the poles **(D)** to the Red Circle **(C)**. **(Diagram 6)**

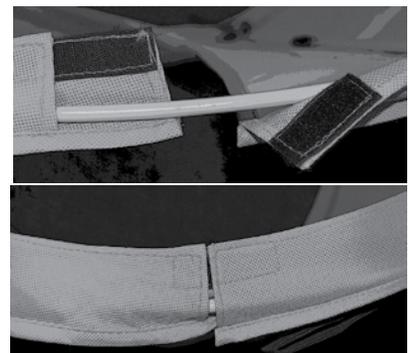

Step 5. Finishing

Slip the material body over the the assembled frame **(Diagram 7)**. Make sure that the doorway is between two of the vertical frame poles. Tie the four (4) sets of ties to the Red Circle to the same side of the triangular connector on all four (4) spots. Now, turn the entire structure over.

Start at the Red Doorway. Wrap the Yellow Circle frame with the split velcro area as you can see in **(Diagram 8)**. Make your way around the frame and pull the lip of the material over the edge of the circle. When you reach the other door, cover the circle frame as you did previously. Connect the two ends of the lip with the velcro tab **(Diagram 8)**. Tie the the four (4) sets of ties to the circle frame. Attach the round floor piece to the bottom at the four (4) velcro spots.

(Diagram 7)

(Diagram 8)

Now turn the structure back over. Align and connect the velcro tabs as you place the Mushroom Top on the top of the structure. You are now finished assembling your new Bazoongi Kids™ Play Structure.
