

BAZOONGI KIDS™ Planetarium #PS-PLT Assembly Instructions

ASSEMBLE ONLY WITH ADULT SUPERVISION

**PLEASE READ ALL OF THE DIRECTIONS PRIOR TO BEGINNING ASSEMBLY.
DO NOT APPLY EXCESSIVE FORCE TO THE POLES DURING ASSEMBLY.**

Enjoy your Play Structure and be sure to contact us for any further information or help.

Step 1. Connect and lay out all of the individual poles to ensure that you have all of the following:

- A** = 12 section YELLOW poles with cord connecting all pieces (qty 1)
- B** = 12 section BLACK poles with cord connecting all pieces (qty 1)
- C** = 5 section BLACK poles with cord connecting all pieces (qty 3)
- D** = 6 section BLUE poles with cord connecting all pieces (qty 6)

Step 2. Assembling the Circles

First you will need to make circles from the twelve (12) section poles. Connect the sections together until you have two straight sections that are six (6) a piece **(Diagram 1)**.

Hold the pole vertically. Grasp the top sections of the pole and while pushing downward connect the top triangular connector to the yellow pole section. This will result in a "U" shape forming **(Diagram 2)**. Now take the opposite end and bring it up to connect it together. Push downward on both sides you are going to connect, using the floor as resistance with the opposite side. Once connected you should have a circle shape **(Diagram 3)**. Repeat this process with the other pole to complete the top and bottom circles **(Diagram 4)**.

Planetarium #PS-PLT Assembly Instructions

Step 3. Assembling the Frame

Lay the bottom circle **(A)** on the ground with the black connectors facing upward. Now take the 2 section blue poles **(D)** and insert them into the six connectors of the bottom circle. Next, connect the top circle **(B)** onto the 2 section blue poles **(D)**. Make sure that the black connectors alternate between facing downward and upward. **(Diagram 5)**.

(Diagram 5)

Now take the 5 section black poles **(C)**. Insert one pole into the upward facing connector of the top circle and arch and connect the other end to the connector directly opposite from it. Repeat for the other two poles. **(Diagram 6)**.

(Diagram 6)

Step 4. Finishing

Slip the material body over the the assembled frame. Make sure that the doorways are between two of the vertical frame poles.

Start at the Arch Doorway. Wrap the Yellow Circle frame with the split velcro area.

Make your way around the frame and pull the lip of the material over the edge of the circle. When you reach the other door, cover the circle frame as you did previously.

Connect the two ends of the lip with the velcro tab. Use the ties at the top of the roof and along the two circle frame poles to secure the body to the frame.

Attach the round floor piece to the bottom at the velcro spots.

****GLOW IN THE DARK STARS****

The glow in the dark stars must be exposed to light before they will glow in the dark.

The longer they are exposed to light the longer they will glow. If any portion of a star breaks off, please dispose of the star as it could be choking hazard to small children.
