

# Wiki Whale Manual

ASSEMBLE ONLY WITH ADULT SUPERVISION

**PLEASE READ ALL OF THE DIRECTIONS PRIOR TO BEGINNING ASSEMBLY.  
DO NOT APPLY EXCESSIVE FORCE TO THE POLES DURING ASSEMBLY.**

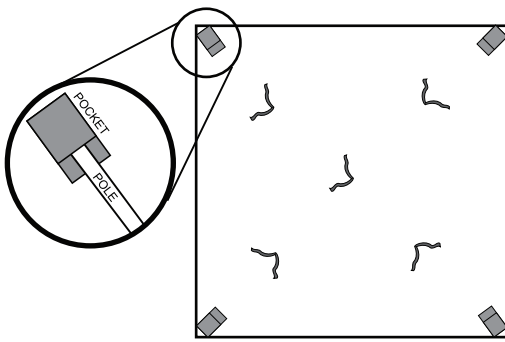

Enjoy your Play Structure and be sure to contact us for any further information or help.

**Step 1.** Connect and lay out all of the individual poles to ensure that you have all of the following:

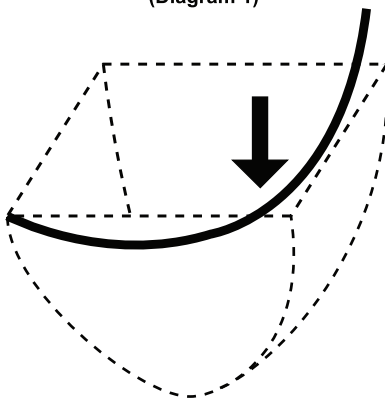

A = 7 Section poles with cord connecting all pieces with Blue tags (qty 2 ~ 112" length)

## Step 2. Assembling the Whale

Assemble the Blue Tagged Poles. Find the four (4) pockets located at the corners of the structure. Take one of the poles and put one end of it into the pocket (**Diagram 1**). While holding the pole in place, push the pole so that it archs away from you and insert the other end of the pole into the pocket on the opposite corner (**Diagram 2**). This will force the top into an arched shape. Repeat the step with the other pole so that the poles crisscross each other at the top of the structure. Tie the poles to the structure body with the ties located at the 5 spots along the seams.

(Diagram 1)

(Diagram 2)

## Step 3. Finishing

Attach the floor piece to the bottom at the velcro spots. Inflate the bladder inside the tail attachment by unzipping the non woven sleeve on the tail & attaching the provided pump to the bladder's valve. Begin inflating and continue to inflate until you reach desired pressure. Be sure not to overinflate as you will burst bladder. Close valve and zip up the tail sleeve around bladder. Attach to velcro piece provided on the floor piece. There is a water spout velcro attachment for the rooftop, arrange the "Spray" after attaching and enjoy the fun.
